

EXCERPT HOTEL PROJECTS

We are often asked where our parquet flooring has been installed. The answer is: all over the world. Here are just a few of our satisfied customers - there are, of course, many more.

SCHEUCHER PARQUET LIFESTYLE

MILLIONS OF SQUARE METERS OF PARQUET LEAVE OUR HEADQUARTERS IN AUSTRIA EVERY YEAR, UNDERLINING THE SOPHISTICATED FLAIR OF INTERNATIONAL HOTEL PROJECTS.

Scheucher Parkett is specialized in the production of fine parquet creations and is perfectly attuned to the requirements of modern construction processes: the high-quality wooden floors underline the cultivated flair of international hotel projects. They enhance elegant suites and lofts, restaurants and bars. And they lend business and congress architecture an exquisite atmosphere and ensure a sense of well-being in any private building project.

In doing so, the Scheucher brand is always regarded as a promise of quality and is characterized by its unbroken loyalty to its Austrian location even though the customer structure is becoming increasingly international: From product development to production and sales, all stages of the value chain are carried out in the densely wooded region of Styria. 250 employees, mainly from the region, are the specialists for precision and quality behind a sophisticated machine park in one of the most modern finished parquet factories in Europe. All of this ensures the top-quality products that meet the highest global standards in terms of sustainability and zero emissions.

OUR COMMITMENT TO SUSTAINABILITY

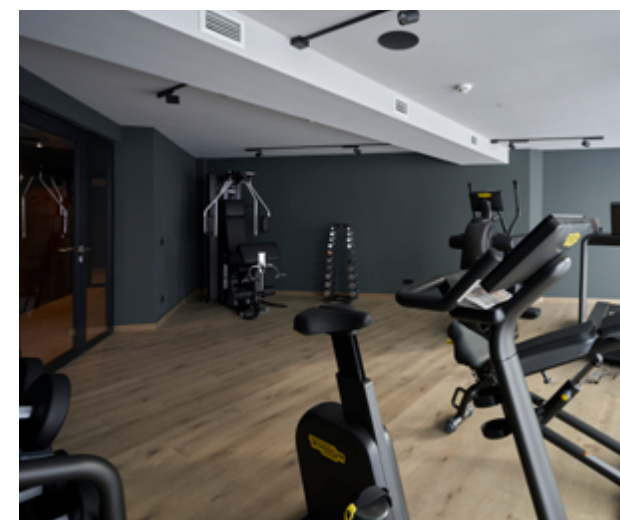

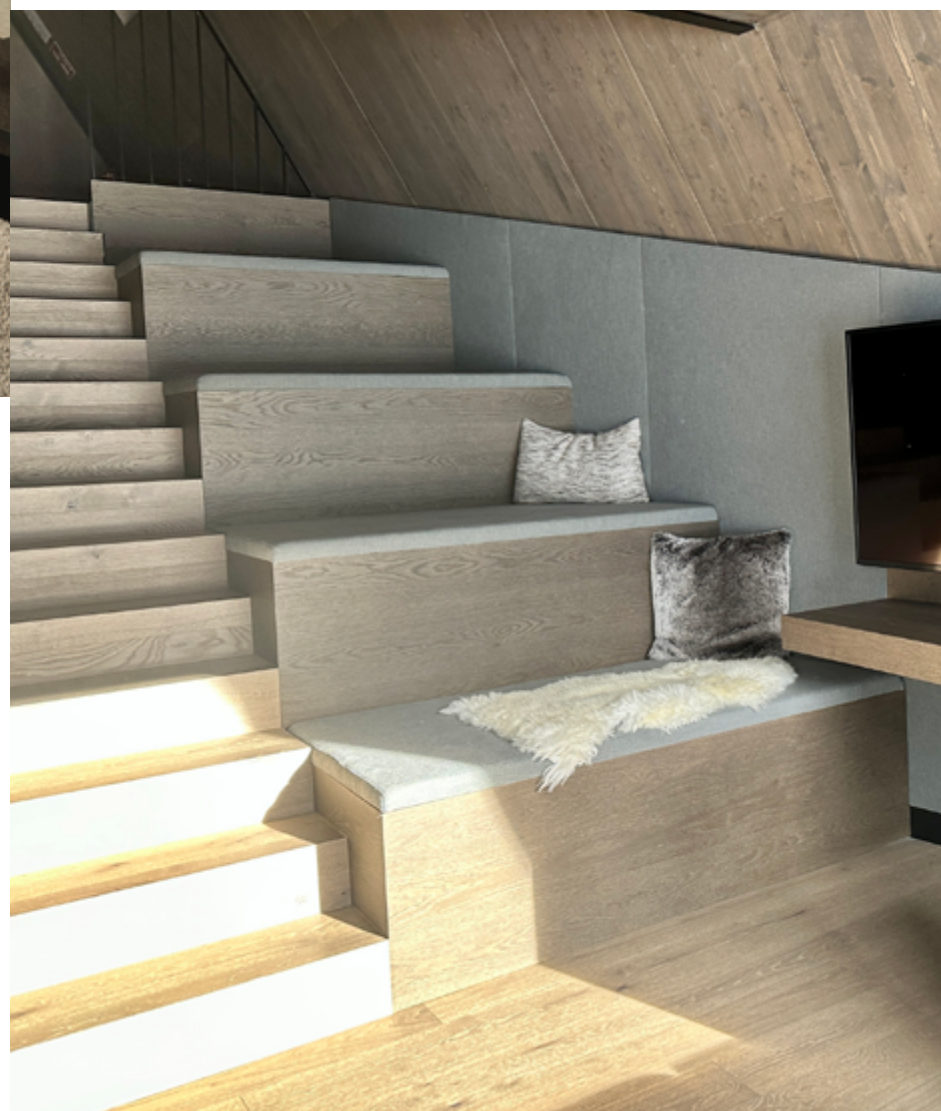

In a world without borders, new projects are waiting to be realized; new residential and living spaces stand on solid ground.
